The Supply of Commercial Satcom

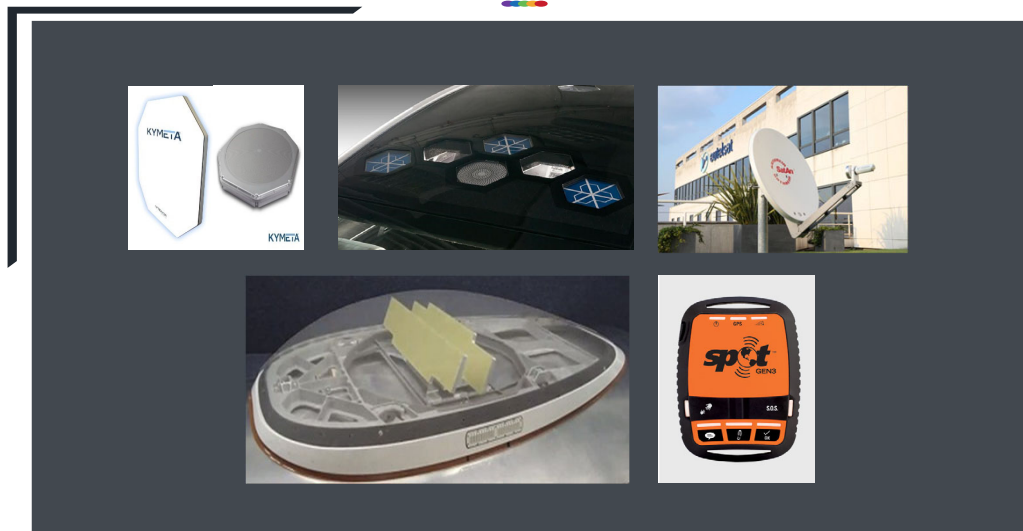

- Traditional satellites**
 - ❖ Ever more satellites being launched – commercial & gov't
 - ❖ NarrowBand – GlobalStar and Iridium are profitable and growing
 - ❖ GEO – traditional satellites transitioning to HTS satellites transitioning to xHTS (1 Tbps per satellite)
- LEO/MEO - Dozens of new constellations – from medium sats to smallsats to cubesats – imaging, broadband, and IoT**
- Vast increases in capacity**
- Expecting decreases in terminal costs**
